

COMPANY PROFILE

Large chiller room construction

M_G MULTI
GROUP INC.

MULTI-GROUP INCORPORATED *MOZAMBIQUE*

Multi Group Inc - HVAC and Refrigeration

An HVAC & Refrigeration Subsidiary of Multi Group Inc.

About Us

COOL REACTION - HVAC and Refrigeration, now a proud subsidiary of **Multi Group Inc.**, is a premier provider of energy-efficient **Refrigeration, Air-Conditioning, and Ventilation (HVAC-R)** solutions. With a legacy spanning over 33 years, we specialise in serving the industrial, commercial, and residential sectors from our base in Centurion.

Our operational philosophy is built on a foundation of technical excellence, leveraging fully qualified technicians and expert subcontractors. As part of our commitment to broad-based economic development, we partner with **BEE-certified companies** for product supply.

Our Mission

To deliver exceptional value through:

- **Highest standard of service** and rapid response times
- Supply of high-quality, energy-efficient products from leading brands
- Affordable and cost-effective solutions
- Professional, experienced technical teams
- An unwavering commitment to **customer satisfaction** and eco-friendly practices.

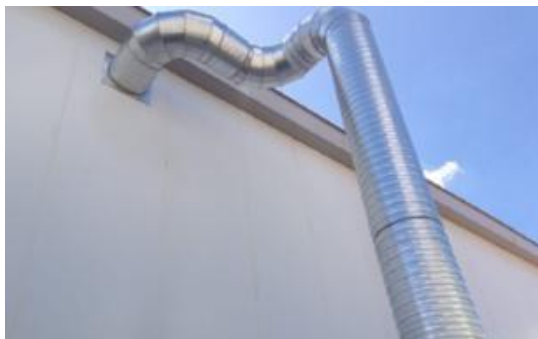

Leadership & Team

Under the **Multi Group Inc.** umbrella, **Multi Group Inc. - HVAC and Refrigeration** continues to be led by industry expert **Graham Bloom**, who now serves as **Managing Partner**. With over 42 years of experience and specialised training with brands like Mitsubishi and Daikin, Graham provides unparalleled technical leadership and strategic direction.

Our operational strength lies with our four dedicated teams of highly skilled technicians, managed directly by Graham Bloom. They are supported by a proficient administrative and media team, ensuring seamless project management and client communication.

Our Services

We build long-term client relationships through reliable and comprehensive service offerings:

- **Installations:** Seamless installation of new units and control panels, ensuring full operational readiness.
- **Maintenance:** Thorough inspection, cleaning, and servicing to keep systems in outstanding condition.

- **Repairs:** Efficient troubleshooting and restoration of systems using high-grade tools and equipment.
- **Dehumidification:** Advanced moisture control to improve air quality and prevent mould growth.

Our Products

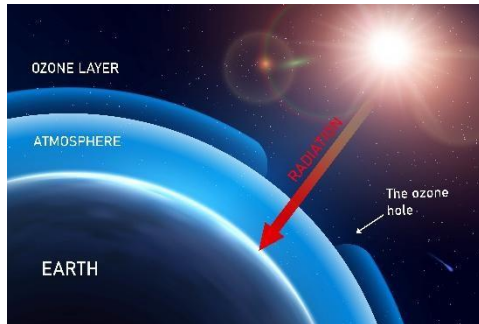

We partner with the best brands in the industry to sell and supply high quality products at low costs.

These brands include:

Our Green Approach

As industry leaders, we are committed to sustainable and energy-efficient solutions that protect the environment and reduce operational costs for our clients.

Refrigeration: Use of non-depleting refrigerants (**R410A/R507/R404A**) in compliance with international protocols.

Compliance with Montreal Protocol Phase out of CFC gasses.

Air-Conditioning: Promotion of inverter compressors and DC motors for significant energy savings.

- **Inverter compressors** (Convert DC to AC power; speed varies to only consume power necessary for specific load)
- **DC compressor motors** (Soft start to prevent power supply dips; variable frequency drive to control motor speed)

Heating: Implementation of heat pump technology and LED lighting.

Heat pumps: (Separates hot from cold molecules in air instead of using electric heating element)

- **Energy-saving lights** (LED Lighting)

Hybrid Systems: Design and installation of solar PV arrays and wind turbine systems for renewable energy generation.

Notable Projects & Achievements

With a project portfolio spanning three decades, **Multi Group Inc - HVAC and Refrigeration** has demonstrated its capability and reliability across a wide range of complex installations, both domestically and internationally.

Select Project Highlights:

- **ESKOM:** Supply and installation of 700 Daikin inverter systems.
- **Albert Luthuli House (ANC Head Office):** Revamp of all AC units and power distribution boards.
- **Plennegy:** Energy-saving refrigeration for a 3,000m² facility.
- **Bassets Ice Cream:** Design and construction of a large-scale ice-cream manufacturing system.

Century Development: Installation of 448 heat pumps.

French Embassy: Long-term service contract.

International Projects: Successful cold room and refrigeration projects in Mozambique, Zambia, Kenya, and Namibia for clients like Starke Ayres.

Client Testimonials

"Graham and his Team are our go-to Company for Air-conditioning in the Johannesburg area for good reason. I would gladly recommend his company for any chiller or air-conditioning installations across Africa." — Simon Pride, Group Manager: Integrated Operations, Plennegy

"We are greatly satisfied with their services... The Toshiba VRF system has led to extreme energy efficiency and huge electrical savings. - Ackemans Pharmacy

"We have always found his service prompt, reasonable and efficient... His workers are courteous and trustworthy." – Solly Zaslansky, Finance Director, French Embassy in South Africa.
